SUMMARY

Results-driven System Architect and Full Stack Developer with 5+ years of experience designing and delivering enterprise-grade technology solutions across ERP, HRIS, CRM, and AI Integration domains. Proven track record of translating complex business requirements into cost-efficient system architectures and reducing project delivery timelines by up to 20% through Agile methodologies and AI-assisted development workflows. Adept at leading cross-functional teams, managing multiple concurrent engagements, and serving as a technical bridge between business stakeholders and engineering teams. Proficient in Laravel, Vue.js, and Node.js with deep expertise in system integration and database optimization.

EXPERIENCE

PT Smartindo Integrasi System - Jakarta, Indonesia
System Architect (Apr 2026 - Present)

- Lead end-to-end integration architecture for enterprise systems including HRIS, Core Sales & Purchase, Accounting & Finance, CRM, Project Management, Helpdesk, Ticketing, and AI Integration modules.
- Define system integration standards and ensure interoperability across all platforms to support business scalability and operational continuity.
- Collaborate with C-level stakeholders to align technology roadmaps with organizational growth objectives.

System Analyst - Contract (Dec 2024 - Apr 2026)

- Analyzing, documenting, and refining business processes to ensure system requirements accurately reflect functional and operational needs.
- Translating complex business requirements into clear, actionable system specifications for development teams.
- Enhancing the front-end layout and interaction flow for the internal system (Version 2), with a focus on improving usability, accessibility, and overall user experience.
- Reviewing frontend and backend code produced by IT developers to ensure alignment with system requirements, coding standards, and performance expectations.
- Serving as a technical advisor in multi-departmental projects, providing insights on optimal system architecture, integration feasibility, and implementation best practices.
- Acting as a communication bridge between stakeholders, product owners, and developers to maintain alignment on system goals, deliverables, and priorities.
- Leading and facilitating agile ceremonies including daily stand-ups, sprint planning, sprint reviews, and retrospectives to ensure effective team coordination and productivity.
- Breaking down system requirements into actionable development tasks, prioritizing them based on urgency, impact, and team capacity.
- Monitoring progress of development tasks, proactively identifying potential blockers, and coordinating resolution to maintain smooth and timely delivery cycles.
- Ensuring system updates and new features meet quality standards through continuous review and validation.
- Reviewing backend logic and database structure to identify opportunities for performance optimization.
- Designing and recommending improved database queries and structures to ensure large datasets can be processed and rendered efficiently on the frontend.
- Collaborating with developers to implement scalable and high-performance solutions.

Jin Mu Group - Jakarta, Indonesia
Software Engineer (Jan 2026 - Present)

- Developed JINMU POS Resto Cashier system and Supply Chain Restaurant Management platform from scratch using Laravel and Vue.js.
- Architected full-stack solution covering order management, inventory control, and real-time reporting for restaurant operations.

Sapta Tunas Teknologi, PT - Jakarta, Indonesia
System Architect (Jun 2025 - Present)

- Design and oversee system architecture for enterprise technology solutions, ensuring

alignment with business strategy and scalability requirements.

Quantum Forge Software Makassar - Makassar, Indonesia
IT Tech Consultant - Full Time (Nov 2023 - Feb 2025)

- Conduct in-depth analysis of clients' IT systems and business requirements to design and implement effective technological solutions that enhance operational efficiency and support business objectives.
- Lead and manage IT projects from inception to completion, ensuring timely delivery, adherence to budget, and alignment with clients' strategic goals. This includes coordinating with stakeholders, configuring systems, and providing training and support to end-users.
- Monitor and evaluate the performance of implemented solutions, providing ongoing support and recommendations for improvements. Stay updated with emerging technologies and industry trends to suggest innovative solutions that drive business growth and competitiveness.

Quantum Forge Software Makassar - Makassar, Indonesia

- Software Engineer - Freelance (January 2023 – May 2026)
- Engineered and optimized dynamic front-end and server-side components of web applications using Node.Js, Bootstrap, Vue.js and Laravel significantly enhancing application responsiveness and reliability.
- Spearheaded collaboration with designers, product managers, and developers to gather requirements and design solutions, resulting in a 20% reduction in project delivery time and ensuring alignment with technical and user requirements.
- Wrote clean, maintainable code following best practices, optimized applications for speed and scalability, and resolved issues, leading to improved application performance and reliability

PT Antariksa Prakarsa Utama - Makassar, Indonesia
IT Business Integration Manager - Full Time (Sept 2022 – Sept 2024)

- Oversaw the alignment of technology solutions with business strategies, using tools like Git and PHP to enhance efficiency and support organizational goals, resulting in improved operational success
- Led cross-functional projects integrating IT systems, using Trello and Google Drive to improve communication between IT and other departments, increasing project success by 20%

PT Antariksa Prakarsa Utama - Makassar, Indonesia
Business System Analyst - Full Time (Aug 2020 – Sept 2022)

- Analyzed business processes, identified technology needs, and implemented systems that support business operations.
- Led teams, managed budgets, and ensured all IT projects were delivered on time and within scope, thereby contributing to the overall success of the organization.

PT Bank DBS Indonesia - Jakarta, Indonesia
IT Apps Support - Internship (February 2019 - February 2020)
Supported the IT Apps Support team at DBS Bank, gaining practical experience in:

- User Acceptance Testing (UAT),
- Maintaining applications to ensure they run smoothly on both production and UAT servers,
- Communicated with users regarding application-related issues and requirements.
